

Turbine 34

By Katherine Clements

Book Details

PART OF THE NORTHERN WEIRD PROJECT

In the near future, England is experiencing the hottest summer in living memory. An unnamed environmental scientist is tasked with evaluating the impact of a controversial new wind farm on the West Yorkshire moors. Camped out alone by the base of Turbine 34 – the most remote of the new turbines, built on an ancient peat bog – she spends her days gathering samples. But when she discovers signs of the devastation caused by the construction, she begins to see things – things that shouldn't be there.

She has dedicated her life to protecting the moor, but will it protect her?

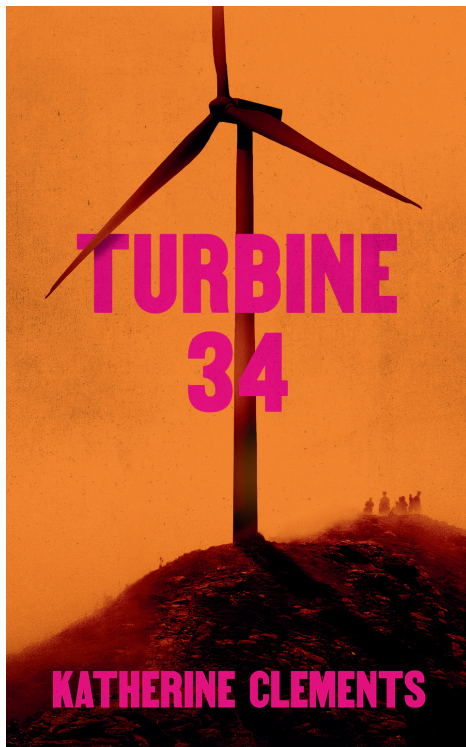

Inspired by a real-life proposed wind farm in the North of England, *Turbine 34* is for readers of *Dark Matter* and *Wuthering Heights* with a dash of folk horror.

Author Bio

Katherine Clements is the author of three historical novels: *The Crimson Ribbon*, published in 2014, *The Silvered Heart* in 2015, and *The Coffin Path* which became an Amazon bestseller and was nominated for the HWA Gold Crown Award and The Guardian's Not the Booker Prize in 2018.

She is a Royal Literary Fund Fellow and was editor of *Historia*, the online magazine of the Historical Writers' Association and, for three years was commissioning editor at the Royal Literary Fund magazine *Collected* where she worked with many prize-winning and bestselling writers.
